

## HAUC(UK) Convention 2020

### **New Beginnings: 2020 Vision**

2020 sees our industry facing a whole host of new processes and guidance. With these come new opportunities to finally dismiss our clouded ideas of the past and embrace the future with complete clarity – 2020 Vision

With so many significant advances to discuss, the Convention is your best opportunity to hear first-hand from leading industry experts, all the changes we will collectively need to embrace. New Codes of Practice and guidance on SROH/SROR, Co-ordination, Inspections, Training & Accreditation, along with Street Manager will all play a key part in the day. Discover how innovation in Scotland through their Transport Bill and Wales through their future planning will play a major part in our processes and how we can all learn from each other in driving best practice, both in the way we operate and the way we work and communicate together.

Join the debate in how we consider the implications of climate change for road and street works, embrace diversity and draw the exuberance of youth into our industry to set new standards for the future. Explore how we better serve our customers by providing services which protect the future environment, reduce our carbon footprint and seek innovative ways to reinvent the industry and push the economy forward.

Engage with exhibitors offering cutting edge technology support to help us all in our bid to be effective and efficient, putting our customers at the heart of everything we do

2019 was our best attended event ever and with some really positive feedback, please join us as we're planning to take our 2020 Convention to another level
